To Whom It May Concern

I am writing to appreciate the innovative work of **Master. Archit Rahul Patil** for designing of **POSTPARTUM CUP**, which gives exact and real-time measurement of postpartum blood loss.

I have seen his project (digital presentation, pictorial, project and supporting documents).

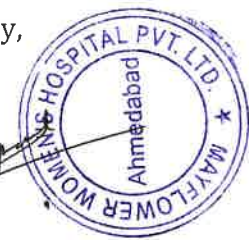

This novel innovation can be a major contribution to the society in reducing the maternal deaths due to PPH because of its diagnosis. This is manufactured from silicone, autoclavable and reusable as claimed by "ARCHIT PPH CUP".

"ARCHIT PPH CUP" can be used for clinical use by obstetrician. It can be used in every public hospital. The government of India and WHO should incorporate ARCHIT PPH CUP in their guidelines as it will help in reducing the maternal mortality rate in India and globally.

We congratulate, Mast. Archit Patil for his novel innovation which is useful for society and is eco friendly. We bless him and wish good luck for his bright future carrier.

Based on further reviews and research on the product we will further recommend the same.

Sincerely,

Dr Sanjay Patel
